Art Unit: 2858

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to capacitance sensor, classified in class 324, subclass 662.
 - II. Claims 8-14, drawn to fingerprint sensor, classified in class 324, subclass 663.
 - III. Claims 15-20, drawn to fingerprint sensing device, classified in class 324, subclass 671.

Inventions I and II, III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus as claimed (invention I) is not an obvious apparatus for making the product as claimed (inventions II, III) and the apparatus can be used for making a different product such as for sensing moisture or humidity.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 2858

claimed because invention II does not require input pulse is applied to the first plate. The subcombination has separate utility such as for object proximity sensing.

Because these inventions are distinct for the reasons given above and the search required for Groups II, III is not required for Group I, and the search required for Group III is not required for Group II restriction for examination purposes as indicated is proper.

Election of Species

2. If applicant elects the invention of Group I or Group II or Group III a further election of species is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- A. Species drawn to embodiment of Figure 3.
- B. Species drawn to embodiment of Figure 4.
- C. Species drawn to embodiment of Figure 10.
- D. Species drawn to embodiment of Figure 11.
- E. Species drawn to embodiment of Figure 12.

Art Unit: 2858

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to attorney Mr. THOMA, PETER J. on 9/14/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2858

Applicant is advised that the reply to this requirement to be complete must include an

Page 5

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

Contact Information

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dr. Anjan K. Deb whose telephone number is 571-272-2228. If

attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, N. Le,

can be reached at (571) 272-2233.
